

Appendix A: Total number of photos submitted per site/season/year combination for the duration of the study period. Note that there are no data for site 7 beyond Fall 2017 or for site 9 beyond Spring 2020. In both cases, these sites were in the dune system on the shore of Lake Huron and were lost during storms as a result of high lake levels. Further, very few photos were submitted in the first season of the long-term project and this is likely related to the variable timing of the site installations. Most analyses in the paper included data from summer 2014 onwards.

Year	Season	Site 1	Site 2	Site 3	Site 4	Site 5	Site 6	Site 7	Site 8	Site 9	Site 10	TOTAL
2014	Spring	0	0	0	0	0	0	3	0	0	0	3
