

Supplemental file 5: Appendix 3. Selected quotations derived from ad hoc

participant feedback via email correspondence.

- "I find it very exciting to get such a direct impression of the animals in their habitat! And enthusiasm is contagious - my 6-year-old daughter is often there too; she always looks forward to the "trips" to Bolivia."
- "I think it's great that there is an opportunity to do something like this. You saved my vacation!!"
- "Great to escape to the wildlife of Bolivia."
- "And I'm really surprised that I've come across so many armadillos. I always thought they were super rare."
- "How incredibly beautiful these animals are, I fell in love."
- "Such a great project! "
- "Had my first Jaguar today...goose bumps!"
- "Addictive!"
- "Labeling helps against wanderlust!"
- "It's just so much fun for me!"
- "Grandpa, do you know why I think the labeling is so great? – We are taken seriously, we are working on a real thing!"
- "The great thing about the project is that you can join at any time."
- "My joy is undiminished; after all, there are animals that I haven't seen yet and even the hundredth south-american coati still triggers screams of delight...oh, actually all of them. Also the cattle, the riders and the moped drivers."
- "For me, this activity is a nice change, also because my husband and I like being in nature and have a great interest in the animal world. Sitting in the rainforest and watching the monkeys or encountering a herd of peccaries - that's something very special. "
- "The whole thing drew me in straight away, I didn't even know that such projects even existed and now I can help, which I think is absolutely awesome."
